

Impact sound interrupter
WBT-0718

New member of the nextgen™ family

With its decoupling frame made of soft elastomer the **impact sound interrupter WBT-0718** prevents impact sound from being transferred.

It acts as an interrupter of disruptive vibrations of a loudspeaker towards connecting elements or pole terminals. The contacts are protected and yet firmly secured in the housing.

Presented just in time for the HIGH END 2010 in Munich the youngest member of the WBT nextgen™ family is already enjoying a huge rush in demand.

WBT nextgen™ products – indispensable for those who want to experience sound in high-end dimensions.

The Art of Connection

nextgen.

WBT sockets & terminals

Peak performance for the components of your hifi system

As a hifi enthusiast you do know what is relevant for good sound. Each cable, each single connection element, each single component, each small detail – everything must be well matched.

Because top quality sound is no coincidence, but the result of an accurate planning and work – just as it is the case of our high quality WBT products.

nextgen™ pole terminal
WBT-0710 Cu

Pole terminals

WBT nextgen™ pole terminals offer an excellent connection for nextgen™ sandwich spades and nextgen™ banana plugs.

They are the central link in a neat and interference-free transmission chain.

RCA sockets

Clear and precise signal in wideband quality* going from your audio source to your amplifier – this is what WBT nextgen™ RCA sockets provide for in all audio devices. This way there is no “weakest link” which would tear your transmission chain.

* Wideband quality: Z = 75 ohm (typ.) up to 1 GHz

Impact sound interrupter

NEW!

Soon available from your WBT specialist dealer – the new impact sound interrupter WBT-0718.

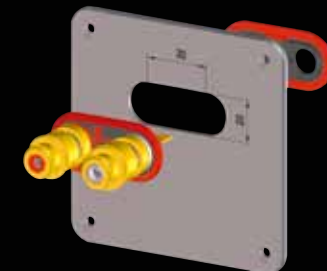

It assures a secure decoupling of impact sound in loudspeakers and electronic equipment (line frequency).

Of course compatible with all WBT pole terminals and WBT RCA sockets! WBT mounting plates are available also with the necessary slot hole for WBT-0718.

Hint: WBT provides special slot hole punches for retrofits.
